OBITUARY.

- DR. JOHN S. STEWART. 208

NOTICE.

- Important to Our Readers. 141
To Contributors. 142

IMPORTANT TO OUR READERS.

As the subscription list of the ANNALS OF OPHTHALMOLOGY AND OTOTOLOGY includes the names of almost all the reputable Ophthalmologists, Otologists and Laryngologists in the United States and English speaking countries of this Continent, it is obvious that its publication would be of value to the medical profession. Therefore as a token of their appreciation of the substantial support given the "ANNALS" the publishers propose to have the list printed, in pamphlet form, for free distribution.

The names will be arranged :

1. Alphabetically.
2. Geographically; to facilitate reference to the specialists in any particular locality.

The specialty or specialties of each subscriber will be stated in connection with the name and address, if communicated to the editor.

New subscribers are requested to write name and address plainly to avoid error in printing.

Back numbers of the "ANNALS" will be furnished to new subscribers until the limited supply is exhausted.

Address all communications to the Editor

JAMES P. PARKER, M. D.,

Kansas City, Mo.

TO CONTRIBUTORS.

Communications are invited from all parts of the world.

Authors who purpose favoring the ANNALS OF OPHTHALMOLOGY AND OTOTOLOGY with contributions are requested to observe the following :

1. In accepting an article for publication under the head of "ORIGINAL COMMUNICATIONS" it is done with the understanding that it is to be contributed to the ANNALS *exclusively*, and that copies or abstracts of the same have *not* been and will *not* be published in any other journal.

2. Writing must be distinct and plain, and *especially all proper names*. (If possible a manuscript should be type-written.)

3. Proofs will be furnished authors for correction and revision, but it is requested that alterations be limited to what is of essential importance, as changes in the copy are equivalent to resetting and cause additional expense and much annoyance.

4. The ANNALS especially desires brief, mature, concise articles on practical subjects, as its readers are busy practitioners who desire results, therefore the author who condenses expression enhances the value of his contribution and is rewarded by having it extensively read.

5. Authors will receive gratuitously one hundred (100) reprints of their articles, in pamphlet form, with good covers, handsomely printed on the finest quality of book paper. If a greater number is desired they will be furnished at cost of press work, paper and binding.

The ANNALS will be published on or about the first of JANUARY, APRIL, JULY and OCTOBER and all original articles should be ready to place in the hands of the printer sixty days before date of publication.
